THE OPERATOR BLUEPRINT

PATH 07

Productized AI service

Do not sell hours. Sell a named package with a date on it.

Who this is for

You can get a result for someone else in a known number of days, using AI for draft and you for quality.

First sale

One paid package with a written scope.

Time to first

3–14 days with outreach

Cash window

\$300–\$1,500 first packages

Tools

Calendly, Stripe invoice or deposit link, a one-page agreement.

Leave this alone

A menu of 12 services. Unlimited revisions. Custom everything.

Why this prints cash faster than a file

A service is slower to scale and faster to cash. If you need money this month, this path beats a playbook. You will still take notes. Those notes become path 1.

The package has a name, a deliverable, a timeline, a price, and a definition of done. 'I'll help with your AI' is not a package. '12 posts and one landing draft in 7 days for \$600' is.

The first 72 hours

Write the package on one page: who, what is in, what is not, timeline, price, what they must provide, how many revisions (one is enough).

Send it to ten people who already trust you. Offer one discounted first seat if you need a case, then never discount it again without a reason you can say out loud.

When they say yes, take a deposit before you open a chat window. AI drafts. You edit. They never see the raw model output.

The path, step by step

Step 1. One package. If you have two, you have none.

Step 2. Intake: problem, budget, ability to implement. Missing one? Send them the cheaper file instead.

Step 3. Kickoff form: assets, voice, deadline, examples they like.

Step 4. You run AI internally. Quality is your name, not the model's.

Step 5. Delivery in a folder they own. A 15-minute walkthrough. One revision window.

Step 6. Ask for the referral while they are happy. Then write the SOP so the second job is faster.

Copy

One-pager headline: '12 posts and one landing draft in 7 days. You get files, not a login to my brain.'

Ask: 'I have one seat this week for [package] at [price]. Deposit holds it.'

Week-by-week

Day 1: package page. Days 2–4: ten asks. Days 5–7: deliver the first job. Week 2: SOP. Week 3: full price, no discount.

Mistakes

Working before the deposit. Unlimited revisions. Letting them 'just hop on a call' that becomes the whole job.

Delivering unedited AI text.

Close the book. Do the first 72 hours. Do not tour the rest tonight.
