Live drops of AI packs

A time, a file, a link in the bio. Scarcity must be real.

Who this is for

You have a finished pack and a time you can go live without freezing.

First sale

A live session that produces at least one checkout.

Time to first

Same day as the live if the file is ready

Cash window

Burst sales of the \$19–\$47 file

Tools

TikTok Live, Instagram Live, Stan, a rehearsed first two minutes.

Leave this alone

Fake countdown timers. Going live with nothing to sell.

How a drop works

Announce a time. Go live for 20 minutes. Show the thing. Checkout in the bio. Scarcity is a date, a cohort, or a version — not a fake 'only 3 left' on a digital file you can copy forever.

Rehearse the first two minutes. The rest can be human. Have the link ready before you go live. If you fumble the URL, the moment dies.

The first 72 hours

Finish the pack. Set the time. Tell people twice. Go live. Show the screen. Repeat the link out loud.

The path, step by step

Step 1. One file, one price.

Step 2. A start time you can keep.

Step 3. Demo, not a lecture.

Step 4. After the live, a replay or a static page for people who missed it. The live is the event. The page is the store.

Mistakes

Lying about stock. Reading comments and never showing the product. Going live daily until nobody cares.

Copy and week-by-week

'Thursday 7pm. I show the file. Link in bio. Twenty minutes.'

Day 1: finish the pack. Day 2: announce. Day 3: live. Then a static page for people who missed it.

Close the book. Do the first 72 hours. Do not tour the rest tonight.
